**Geometry** David A. Brannan, Matthew F. Esplen, Jeremy J. Gray

This richly illustrated and clearly written undergraduate textbook captures the excitement and beauty of geometry. The approach is that of Klein in his Erlangen programme: a geometry is a space together with a set of transformations of the space. The authors explore various geometries: affine, projective, inversive, hyperbolic and elliptic. In each case they carefully explain the key results and discuss the relationships between the geometries. New features in this second edition include concise end-of-chapter summaries to aid student revision, a list of further reading and a list of special symbols. The authors have also revised many of the end-of-chapter exercises to make them more challenging and to include some interesting new results. Full solutions to the 200 problems are included in the text, while complete solutions to all of the end-of-chapter exercises are available in a new Instructors' Manual, which can be downloaded from [www.cambridge.org/9781107647831](http://www.cambridge.org/9781107647831).

### From reader reviews:

#### **Katherine Belcher:**

Have you spare time to get a day? What do you do when you have a lot more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the particular Mall. How about open or even read a book allowed Geometry? Maybe it is being best activity for you. You recognize beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have additional opinion?

#### **Fabiola Gaylor:**

Nowadays reading books are more than want or need but also turn into a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book which improve your knowledge and information. The information you get based on what kind of publication you read, if you want have more knowledge just go with education books but if you want experience happy read one together with theme for entertaining for example comic or novel. The Geometry is kind of guide which is giving the reader unforeseen experience.

#### **Maria Freeman:**

Are you kind of occupied person, only have 10 or even 15 minute in your day time to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you have problem with the book compared to can satisfy your short space of time to read it because pretty much everything time you only find reserve that need more time to be read. Geometry can be your answer given it can be read by an individual who have those short time problems.

#### **Betty Dunham:**

As a college student exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's heart or real their hobby. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful pictures on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Geometry can make you truly feel more interested to read.
