Multimodal registration of fundus camera and OCT retinal images: Image registration of the eye from different scanning devices Ondřej Bžák

This work is dealing with multimodal registration of retina from different scanning devices. With this multimodal registration is possible to enhance some details on the images which are crucial to detect different types of eye diseases (such as glaucoma, nerve fibre layer degradation, vessel degradation, etc.). The theoretical background of this book is followed by practical application which describes different types of registration of fundus, SLO and OCT images.
