Introduction to Topological Manifolds: 940 (Graduate Texts in Mathematics) John Lee

This book is an introduction to manifolds at the beginning graduate level, and accessible to any student who has completed a solid undergraduate degree in mathematics. It contains the essential topological ideas that are needed for the further study of manifolds, particularly in the context of differential geometry, algebraic topology, and related fields.

Although this second edition has the same basic structure as the first edition, it has been extensively revised and clarified; not a single page has been left untouched. The major changes include a new introduction to CW complexes (replacing most of the material on simplicial complexes in Chapter 5); expanded treatments of manifolds with boundary, local compactness, group actions, and proper maps; and a new section on paracompactness.

From reader reviews:

Irene Gwyn:

This book untitled Introduction to Topological Manifolds: 940 (Graduate Texts in Mathematics) to be one of several books that will best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit upon it. You will easily to buy this particular book in the book retailer or you can order it by using online. The publisher with this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Cell phone. So there is no reason for you to past this e-book from your list.

Lee Erbe:

People live in this new moment of lifestyle always make an effort to and must have the time or they will get great deal of stress from both lifestyle and work. So , if we ask do people have time, we will say absolutely indeed. People is human not only a robot. Then we question again, what kind of activity are there when the spare time coming to you of course your answer can unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, often the book you have read is actually Introduction to Topological Manifolds: 940 (Graduate Texts in Mathematics).

Henry Taylor:

As we know that book is significant thing to add our know-how for everything. By a e-book we can know everything we wish. A book is a set of written, printed, illustrated or blank sheet. Every year has been exactly added. This e-book Introduction to Topological Manifolds: 940 (Graduate Texts in Mathematics) was filled in relation to science. Spend your free time to add your knowledge about your technology competence. Some people has various feel when they reading some sort of book. If you know how big benefit from a book, you can experience enjoy to read a e-book. In the modern era like today, many ways to get book that you wanted.

Beverly Hill:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information from a book. Book is written or printed or outlined from each source in which filled update of news. In this modern era like currently, many ways to get information are available for you. From media social like newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Introduction to Topological Manifolds: 940 (Graduate Texts in Mathematics) when you necessary it?
