Polymers from Agricultural Coproducts (ACS Symposium Series)

Polymers from Agricultural Coproducts (ACS Symposium Series)

Discusses the production of polymers from sustainable and renewable agricultural resources. Includes overviews discussing the rationale and economic prospects for producing various polymers from agricultural materials and the status of the technology used to produce degradable polymers. Reviews the characterization, synthesis, modification, and isolation of specific groups of polymers and polymeric materials, including starches, starch blends, composites, other polysaccharides, oligosaccharides, monosaccharides, polyamides, proteins, polyesters, and rubbers.
