Crisis Management for Software Development and Knowledge Transfer (Smart Innovation, Systems and Technologies)

Sergey V. Zykov

Crisis Management for Software Development and Knowledge Transfer (Smart Innovation, Systems and Technologies) Sergey V. Zykov

This well structured book discusses lifecycle optimization of software projects for crisis management by means of software engineering methods and tools. Its outcomes are based on lessons learned from the software engineering crisis which started in the 1960s. The book presents a systematic approach to overcome the crisis in software engineering depends which not only depends on technology-related but also on human-related factors. It proposes an adaptive methodology for software product development, which optimizes the software product lifecycle in order to avoid “local” crises of software production. The general lifecycle pattern and its stages are discussed, and their impact on the time and budget of the software product development is analyzed. The book identifies key advantages and disadvantages for various models selected and concludes that there is no “silver bullet”, or universal model, which suits all software products equally well. It approaches software architecture in terms of process, data and system perspectives and proposes an incremental methodology for crisis-agile development of large-scale, distributed heterogeneous applications. The book introduces a number of specialized approaches which are widely used in industry but are often ignored in general writings because of their vendor-specificity. In doing so, the book builds a helpful bridge from academic conceptions of software engineering to the world of software engineering practice. With its systematic coverage of different software engineering methodologies and the presented rich systems engineering examples the book will be beneficial for a broader audience.

From reader reviews:

Sharon Gaines:

What do you in relation to book? It is not important with you? Or just adding material when you really need something to explain what the ones you have problem? How about your extra time? Or are you busy man? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Every individual has many questions above. They have to answer that question simply because just their can do in which. It said that about guide. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need this kind of Crisis Management for Software Development and Knowledge Transfer (Smart Innovation, Systems and Technologies) to read.

Betty Ahlstrom:

Hey guys, do you would like to finds a new book to see? May be the book with the concept Crisis Management for Software Development and Knowledge Transfer (Smart Innovation, Systems and Technologies) suitable to you? Typically the book was written by popular writer in this era. Typically the book untitled Crisis Management for Software Development and Knowledge Transfer (Smart Innovation, Systems and Technologies) is the main one of several books which everyone read now. That book was inspired many people in the world. When you read this e-book you will enter the new shape that you ever know before. The author explained their strategy in the simple way, and so all of people can easily to recognise the core of this reserve. This book will give you a lot of information about this world now. In order to see the represented of the world in this book.

Sylvia Harrington:

It is possible to spend your free time to see this book this book. This Crisis Management for Software Development and Knowledge Transfer (Smart Innovation, Systems and Technologies) is simple to develop you can read it in the park, in the beach, train as well as soon. If you did not have got much space to bring the particular printed book, you can buy the e-book. It is make you better to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Gretchen Clark:

On this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become one of it? It is just simple solution to have that. What you need to do is just spending your time very little but quite enough to possess a look at some books. Among the books in the top checklist in your reading list will be Crisis Management for Software Development and Knowledge Transfer (Smart Innovation, Systems and Technologies). This book which is qualified as The Hungry Mountains can get you closer in turning into precious person. By looking way up and review this reserve you can get many advantages.
