## **Judgment and Planning in Chess** Dr. Max Euwe

This is a basic book that teaches strategic planning in chess. It is a book that an entire generation of aspiring chess players studied and read, but seems to be nearly forgotten today. Written by a former Chess Champion of the world, this book has as its basis an entirely novel idea which will help players over a real difficulty. Many books have been written on the openings, some knowledge of which is essential to those who wish to enjoy their chess by playing it well. But after eight to fifteen moves or so the book on openings must of necessity break off, and the student is left with the intimation that the position in question is even, or that White or Black stands slightly better. This book is concerned with the game from then on. The author studies a number of orthodox openings and position from the point where the opening stage has come to an end. He describes the characteristics of the position reached, shows why one or the other side stands better, and gives a thoroughly practical demonstration of the means by which the game can be brought to its logical conclusion.
