Tame Flows (Memoirs of the American Mathematical Society) Liviu I. Nicolaescu

The tame flows are "nice" flows on "nice" spaces. The nice (tame) sets are the pfaffian sets introduced by Khovanski, and a flow $\Phi: \mathbb{R} \times X \rightarrow X$ on pfaffian set X is tame if the graph of Φ is a pfaffian subset of $\mathbb{R} \times X \times X$. Any compact tame set admits plenty tame flows. The author proves that the flow determined by the gradient of a generic real analytic function with respect to a generic real analytic metric is tame.
