CHAPTER I

INTRODUCTORY

The scope of twentieth century auditing is so extensive that there are very few industries which are not important enough to justify an entire book dealing with their own special problems. The Accountants' Index, published by the American Institute of Accountants, which refers to little more than titles of books, and articles on special subjects, contains 1578 pages.

Much important cost, and constructive auditing work is being done by specialists for whom there is a large and constantly increasing field. This volume, however, is not designed for the specialist who seeks light regarding his specialty. It is written expressly for students and for those who desire to know something more or less technical about a number of businesses.

When an auditor gets away from the general principles of auditing, he should think and act modestly. Of course, we should always try to be modest; but sometimes when an auditor knows that he is right in a matter
