Designing Stress Resistant Organizations demonstrates, in a persuasive way, how computational organization theory can be applied to advance the field of management with its successful integration of theory and practice.

At the theoretical level, the book contains a comprehensive computational framework called DYCORP, which simulates dynamic and interactive organizational behaviors by incorporating multiple factors such as organizational design, task environment, and stress, and which generates consistent and insightful propositions on organizational performance.

The book utilizes an organization science based approach to computational modeling. This approach recognizes the limit of human cognition as it was outlined by Herbert A. Simon in 1947. The model strives to focus on the essence of the reality that is most relevant to the research issue. This approach has been proven to be more beneficial for us to understand the underlying dynamics of the phenomenon.

From reader reviews:

Perla Baxter:

Playing with family inside a park, coming to see the coastal world or hanging out with buddies is thing that usually you might have done when you have spare time, then why you don't try issue that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series), you may enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh come on its mind hangout guys. What? Still don't have it, oh come on its known as reading friends.

Stella Keith:

Does one one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't assess book by its cover may doesn't work this is difficult job because you are scared that the inside maybe not because fantastic as in the outside search likes. Maybe you answer could be Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) why because the amazing cover that make you consider in regards to the content will not disappoint an individual. The inside or content is fantastic as the outside or cover. Your reading sixth sense will directly make suggestions to pick up this book.

David Scott:

In this time globalization it is important to someone to receive information. The information will make you to definitely understand the condition of the world.
