Ecological Dynamics on Yellowstone's Northern Range discusses the complex management challenges in Yellowstone National Park. Controversy over the National Park Service's approach of "natural regulation" has heightened in recent years because of changes in vegetation and other ecosystem components in Yellowstone's northern range. Natural regulation minimizes human impacts, including management intervention by the National Park Service, on the park ecosystem. Many have attributed these changes to increased size of elk and other ungulate herds.

This report examines the evidence that increased ungulate populations are responsible for the changes in vegetation and that the changes represent a major and serious change in the Yellowstone ecosystem. According to the authors, any human intervention to protect species such as the aspen and those that depend on them should be prudently localized rather than ecosystem-wide. An ecosystem-wide approach, such as reducing ungulate populations, could be more disruptive. The report concludes that although dramatic ecological change does not appear to be imminent, approaches to dealing with potential human-caused changes in the ecosystem, including those related to climate change, should be considered now. The need for research and public education is also compelling.

From reader reviews:

John Jacquez:

Reading a reserve tends to be new life style in this era globalization. With examining you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can certainly share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their own reader with their story or maybe their experience. Not only the story that share in the textbooks. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors nowadays always try to improve their skill in writing, they also doing some study before they write to their book. One of them is this Ecological Dynamics on Yellowstone's Northern Range.

Walter Gagne:

People live in this new time of lifestyle always attempt to and must have the free time or they will get lot of stress from both lifestyle and work. So , if we ask do people have free time, we will say absolutely sure. People is human not a robot. Then we consult again, what kind of activity do you have when the spare time coming to a person of course your answer will probably unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative within spending your spare time, often the book you have read will be Ecological Dynamics on Yellowstone's Northern Range.

Donna Kerns:

Playing with family within a park, coming to see the marine world or hanging out with close friends is thing that usually you have done when you have spare time, after that why you don't try factor that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Ecological Dynamics on Yellowstone's Northern Range, you could enjoy both. It is good combination right, you still would like to miss it? What kind of hang-out type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its named reading friends.

Sam Dickson:

What is your hobby? Have you heard which question when you got college students? We believe that that question was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person including reading or as reading through become their hobby. You need to understand that reading is very important in addition to book as to be the factor. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You will find good news or update regarding something by book. Many kinds of books that can you take to be your object. One of them are these claims Ecological Dynamics on Yellowstone's Northern Range.
