## **Practical Applications of GIS for Archaeologists: A Predictive Modelling Toolkit (Gis Data Series)**

The use of GIS is the most powerful technology introduced to archaeology since the introduction of carbon 14 dating. The most widespread use of this technology has been for the prediction of archaeological site locations. This book focuses on the use of GIS for archaeological predictive modeling. The contributors include internationally recognized researchers who have been at the forefront of this revolutionary integration of GIS and archaeology, as well as first generation researchers who have begun to critically apply this new technology and explore its theoretical implications.
