Algebraic Topology (EMS Textbooks in Mathematics) Tammo Tom Dieck

This book is written as a textbook on algebraic topology. The first part covers the material for two introductory courses about homotopy and homology. The second part presents more advanced applications and concepts (duality, characteristic classes, homotopy groups of spheres, bordism). The author recommends starting an introductory course with homotopy theory. For this purpose, classical results are presented with new elementary proofs. Alternatively, one could start more traditionally with singular and axiomatic homology. Additional chapters are devoted to the geometry of manifolds, cell complexes and fibre bundles. A special feature is the rich supply of nearly 500 exercises and problems. Several sections include topics which have not appeared before in textbooks as well as simplified proofs for some important results. Prerequisites are standard point set topology (as recalled in the first chapter), elementary algebraic notions (modules, tensor product), and some terminology from category theory. The aim of the book is to introduce advanced undergraduate and graduate (master's) students to basic tools, concepts and results of algebraic topology. Sufficient background material from geometry and algebra is included. A publication of the European Mathematical Society (EMS). Distributed within the Americas by the American Mathematical Society.

From reader reviews:

John Richardson:

Book is to be different for every single grade. Book for children until adult are different content. As it is known to us that book is very important for all of us. The book Algebraic Topology (EMS Textbooks in Mathematics) ended up being making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The publication Algebraic Topology (EMS Textbooks in Mathematics) is not only giving you considerably more new information but also to become your friend when you sense bored. You can spend your current spend time to read your guide. Try to make relationship using the book Algebraic Topology (EMS Textbooks in Mathematics). You never feel lose out for everything in case you read some books.

Brandy Greenawalt:

Spent a free time to be fun activity to accomplish! A lot of people spent their spare time with their family, or their own friends. Usually they doing activity like watching television, planning to beach, or picnic from the park. They actually doing same every week. Do you feel it? The first thing that you will ask may be what kinds of guide that you should read. If you want to try out look for book, may be the book untitled Algebraic Topology (EMS Textbooks in Mathematics) can be good book to read. May be it might be best activity to you.

David Ashworth:

Reading can called mind hangout, why? Because if you find yourself reading a book especially book entitled Algebraic Topology (EMS Textbooks in Mathematics) your brain will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging each and every word written in a guide then become one form conclusion and explanation this maybe you never get previous to. The Algebraic Topology (EMS Textbooks in Mathematics) giving you another experience more than blown away the mind but also giving you useful details for your better life within this era. So now let us show you the relaxing pattern this is your body and mind will likely be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

Richard Plummer:

Beside that Algebraic Topology (EMS Textbooks in Mathematics) in your phone, it could possibly give you a way to get closer to the new knowledge or info. The information and the knowledge you are going to get here is fresh through the oven so don't become worry if you feel like an older people live in narrow community. It is good thing to have Algebraic Topology (EMS Textbooks in Mathematics) because this book offers for you readable information. Do you at times have book but you would not get what it's about.

Oh come on, that will not happen if you have this inside your hand. The Enjoyable blend here cannot be questionable, just like treasuring beautiful island. So do you still want to miss that? Find this book in addition to read it from now!
