Greg Malone is an analyst at the Advanced Strategies Institute in Springfield, Illinois. He's the leading expert at the think tank in the use of sophisticated math involving game theory. When his bosses want to partner with a Mexican company and plan the use of the NAFTA Superhighway, they assign Greg to analyze the business aspects. Unknown to Greg, his bosses are in cahoots with Mexican drug lord, Juan Vargas, who, among other things, intends to use overwhelming force to intercept a convoy of armored cars carrying a huge shipment of gold bullion from Chicago to Fort Knox. Vargas considers Greg a major obstacle to his success and decides to eliminate him immediately. After surviving the surprise attempt on his life, Greg becomes close friends with local police detective, Jay Green, who investigates the failed hit. He and Jay work together and uncover clues to a larger problem. With clever use of politics and money, Vargas obtains Army tanks from Fort Hood and ships them secretly by train to Springfield. He also purchases some abandoned coal mines nestled in the prairie landscape south of Springfield and close to I-55. The acquisitions improve his storage capability for drug trafficking into Chicago and also provide a great place to hide his tanks. During his analysis of the proposed business with Mexico, Greg discovers the activity around the old coal mines and expresses concern. He now becomes a target for elimination by his bosses as well as Vargas. In tandem with Jay, Greg avoids disaster and discovers the planned gold heist. They, along with additional law enforcement, attempt to disrupt the villains. An ex-Special Forces officer in the United States Army, Greg unleashes his latent skills and makes significant headway. Vargas becomes desperate and successfully arranges the kidnapping of Greg's wife. He figures he now has the leverage to keep his most feared adversary on the sidelines and out of the way. With the new challenges in his path, Greg knows he has to make full use of both his current and former talents. He must first rescue his wife and then thwart Vargas' plans. Failure on either will be catastrophic. As he and Jay plunge forward with a vengeance, Greg is acutely aware that none of his former military missions stirred his passions like this situation. The stakes are off the scale. Intelligent application of all of his diverse skills will be necessary to succeed.
