Scientific Concepts and Investigative Practice (Berlin Studies in Knowledge Research) Uljana Feest

Recent philosophy and history of science have seen a surge of interest in the role of concepts in scientific research. Combining philosophical and historical scholarship, the articles in this volume investigate the ways in which scientists form and use concepts, rather than in what the concepts themselves represent. The fields treated range from mathematics to virology and genetics, from nuclear physics to psychology, from technology to present-day neural engineering.
