ENIAC in Action: Making and Remaking the Modern Computer (History of Computing) Thomas Haigh, Mark Priestley, Crispin Rope

Conceived in 1943, completed in 1945, and decommissioned in 1955, ENIAC (the Electronic Numerical Integrator and Computer) was the first general-purpose programmable electronic computer. But ENIAC was more than just a milestone on the road to the modern computer. During its decade of operational life, ENIAC calculated sines and cosines and tested for statistical outliers, plotted the trajectories of bombs and shells, and ran the first numerical weather simulations. *ENIAC in Action* tells the whole story for the first time, from ENIAC's design, construction, testing, and use to its afterlife as part of computing folklore. It highlights the complex relationship of ENIAC and its designers to the revolutionary approaches to computer architecture and coding first documented by John von Neumann in 1945.Within this broad sweep, the authors emphasize the crucial but previously neglected years of 1947 to 1948, when ENIAC was reconfigured to run what the authors claim was the first modern computer program to be executed: a simulation of atomic fission for Los Alamos researchers. The authors view ENIAC from diverse perspectives -- as a machine of war, as the "first computer," as a material artifact constantly remade by its users, and as a subject of (contradictory) historical narratives. They integrate the history of the machine and its applications, describing the mathematicians, scientists, and engineers who proposed and designed ENIAC as well as the men -- and particularly the women who -- built, programmed, and operated it.

From reader reviews:

Markus Walker:

In this 21st hundred years, people become competitive in each way. By being competitive now, people have do something to make these people survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that often many people have underestimated this for a while is reading. Sure, by reading a reserve your ability to survive enhance then having chance to endure than other is high. For you personally who want to start reading some sort of book, we give you that ENIAC in Action: Making and Remaking the Modern Computer (History of Computing) book as beginner and daily reading publication. Why, because this book is usually more than just a book.

Nancy Samuel:

Spent a free time for you to be fun activity to perform! A lot of people spent their sparetime with their family, or their particular friends. Usually they carrying out activity like watching television, gonna beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your free time/ holiday? Could be reading a book could be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the publication untitled ENIAC in Action: Making and Remaking the Modern Computer (History of Computing) can be good book to read. May be it is usually best activity to you.

Lisa Bentley:

As we know that book is very important thing to add our knowledge for everything. By a reserve we can know everything we wish. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This guide ENIAC in Action: Making and Remaking the Modern Computer (History of Computing) was filled about science. Spend your spare time to add your knowledge about your research competence. Some people has distinct feel when they reading a new book. If you know how big good thing about a book, you can feel enjoy to read a reserve. In the modern era like today, many ways to get book which you wanted.

Marianne Button:

Guide is one of source of expertise. We can add our understanding from it. Not only for students but in addition native or citizen will need book to know the change information of year for you to year. As we know those textbooks have many advantages. Beside most of us add our knowledge, could also bring us to around the world. By the book ENIAC in Action: Making and Remaking the Modern Computer (History of Computing) we can get more advantage. Don't you to be creative people? Being creative person must prefer to read a book. Only choose the best book that appropriate with your aim. Don't possibly be doubt to change your life at this time book ENIAC in Action: Making and Remaking the Modern Computer (History of Computing). You can more inviting than now.
