Hormones, Second Edition

Anthony W. Norman, Gerald Litwack

Hormones, Second Edition Anthony W. Norman, Gerald Litwack

The newly revised and updated **Hormones, Second Edition** provides a comprehensive treatment of human hormones, viewed in light of modern theories of hormone action and in the context of current understanding of subcellular and cellular architecture and classical organ physiology. Each chapter presents a physiological description of the hormone system under consideration, followed by a listing of the mode-of-action of the hormone. This book includes significant advances in the molecular biology of receptors, hormones, and studies of hormone action that have transpired over the past five years. The text updates the material on enzymes related to steroid metabolism and new hormone systems, as well as providing a new chapter on hormones and cancer.

Key Features

- * Completely updates the material, covering new discoveries and significant advances since the First Edition was published in 1987
- * Contains new information regarding steroid hormones, the role of hormones in cancer, and a comprehensive introductory chapter
- * Presents an overview of virtually all important hormones
- * Provides detailed physiological, cellular, and molecular descriptions of classical human endocrine systems
- * Streamlines the presentation of the First Edition, making the book easier to use and read

We advise you for having this kind of Hormones, Second Edition instantly.

Jean Gaskin:

In this time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. The actual book that recommended to your account is Hormones, Second Edition this reserve consist a lot of the information on the condition of this world now. This particular book was represented just how can the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. The writer made some analysis when he makes this book. This is why this book ideal all of you.

Dana Martin:

As a scholar exactly feel bored in order to reading. If their teacher questioned them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's heart or real their pastime. They just do what the professor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Hormones, Second Edition can make you truly feel more interested to read.
