## **Information Flow and Posting in MS Dynamics GP** Richard L. Whaley

This manual serves as a guide to the users and managers that are charged with creating customized reports from their Dynamics GP data. It provides a comprehensive guide to the flow of information through the applications.

Charts show the exact tables updated in the database as a result of each data entry operation and each posting process. Tables list the source of GL account numbers, allowing users to understand EXACTLY how the application obtained the specific account used in each distribution.

And then there are the "Secret Codes." Those 1's, 2's, and 3's that programmers use and record in the data tables that mean something else. Such as 1=Quote, 2=Order, etc. Chapter 8 of this manual lists many of those codes with their definition, allowing you to easily interpret the content of those tables.

If you are a power user, a report writer, a support consultant, or just trying to understand how Dynamics GP moves data and where these account numbers are coming from, you need this manual!
