The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science) William Poundstone

No winners, no losers, and no end — the Game of Life, also known simply as Life, is no ordinary computer game. Created by British mathematician John Horton Conway in 1970, Life debuted in *Scientific American*, where it was hailed as the key to a new area of mathematical research, the field of cellular automata. Less of a game than a demonstration of logical possibilities, Life is based on simple rules and produces patterns of light and dark on computer screens that reflect the unpredictability, complexity, and beauty of the universe. This fascinating popular science journey explores Life's relationship to concepts in information theory, explaining the application of natural law to random systems and demonstrating the necessity of limits. Other topics include the paradox of complexity, Maxwell's demon, Big Bang theory, and much more. Written in the 1980s by a bestselling author, the book remains up to date in its treatment of timeless aspects of physics, including the ways in which complex forms and behavior governed by simple laws can appear to arise spontaneously under random conditions.

From reader reviews:

Ann Wren:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite e-book and reading a reserve. Beside you can solve your short lived problem; you can add your knowledge by the reserve entitled The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science). Try to face the book The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science) as your good friend. It means that it can to be your friend when you really feel alone and beside that of course make you smarter than previously. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know everything by the book. So , let me make new experience and also knowledge with this book.

William Carroll:

The book The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science) can give more knowledge and information about everything you want. Exactly why must we leave the best thing like a book The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science)? Some of you have a different opinion about reserve. But one aim which book can give many info for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or data that you take for that, you may give for each other; you could share all of these. Book The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science) has simple shape nevertheless, you know: it has great and massive function for you. You can appear the enormous world by wide open and read a publication. So it is very wonderful.

Tia Sargent:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their free time with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your free time/ holiday? May be reading a book may be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to try look for book, may be the book untitled The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science) can be fine book to read. May be it can be best activity to you.

Robert Lofton:

Do you have something that you prefer such as book? The publication lovers usually prefer to choose book like comic, small story and the biggest some may be novel. Now, why not trying The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge (Dover Books on Science) that give your entertainment preference will be satisfied simply by reading this book. Reading habit all over the world can

be said as the opportunity for people to know world far better than how they react when it comes to the world. It can't be claimed constantly that reading behavior only for the geeky person but for all of you who wants to end up being success person. So , for all of you who want to start examining as your good habit, you may pick *The Recursive Universe: Cosmic Complexity and the Limits of Scientific Knowledge* (Dover Books on Science) become your own personal starter.
