Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology)

Jason Andrews

Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology) Jason Andrews

Hardware/software co-verification is how to make sure that embedded system software works correctly with the hardware, and that the hardware has been properly designed to run the software successfully -before large sums are spent on prototypes or manufacturing.

This is the first book to apply this verification technique to the rapidly growing field of embedded systems-on-a-chip(SoC). As traditional embedded system design evolves into single-chip design, embedded engineers must be armed with the necessary information to make educated decisions about which tools and methodology to deploy. SoC verification requires a mix of expertise from the disciplines of microprocessor and computer architecture, logic design and simulation, and C and Assembly language embedded software. Until now, the relevant information on how it all fits together has not been available. Andrews, a recognized expert, provides in-depth information about how co-verification really works, how to be successful using it, and pitfalls to avoid. He illustrates these concepts using concrete examples with the ARM core - a technology that has the dominant market share in embedded system product design. The companion CD-ROM contains all source code used in the design examples, a searchable e-book version, and useful design tools.

* The only book on verification for systems-on-a-chip (SoC) on the market

* Will save engineers and their companies time and money by showing them how to speed up the testing process, while still avoiding costly mistakes

* Design examples use the ARM core, the dominant technology in SoC, and all the source code is included on the accompanying CD-Rom, so engineers can easily use it in their own designs

From reader reviews:

Steve Pratt:

Nowadays reading books be a little more than want or need but also become a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book that improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want attract knowledge just go with training books but if you want sense happy read one together with theme for entertaining for example comic or novel. Often the Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology) is kind of guide which is giving the reader unstable experience.

Jeffrey Osburn:

Do you have something that you want such as book? The e-book lovers usually prefer to pick book like comic, quick story and the biggest some may be novel. Now, why not attempting Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology) that give your enjoyment preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the way for people to know world far better then how they react in the direction of the world. It can't be explained constantly that reading behavior only for the geeky particular person but for all of you who wants to end up being success person. So , for every you who want to start reading as your good habit, you are able to pick Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology) become your personal starter.

Dale Randolph:

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some e-book, they are complained. Just very little students that has reading's heart or real their passion. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology) can make you truly feel more interested to read.

Keely Charles:

Some people said that they feel uninterested when they reading a guide. They are directly felt that when they get a half regions of the book. You can choose the book Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology) to make your own reading is interesting. Your personal skill of reading proficiency is developing when you similar to reading. Try to choose easy book to make you enjoy to learn it and mingle the opinion about book and reading through especially. It is to be 1st opinion for you to like to

start a book and study it. Beside that the book Co-verification of Hardware and Software for ARM SoC Design (Embedded Technology) can to be a newly purchased friend when you're feel alone and confuse in what must you're doing of the time.
