Shapes are everywhere, and math students get a chance to explore shapes and their attributes, all while having fun. Familiar storylines and relatable contexts help students practice various principles of geometry, such as composing two-dimensional shapes, decomposing and partitioning shapes, and distinguishing between defining and non-defining attributes. Bright visuals reinforce the essential math concepts that every geometry student must master. This book guides readers through drawing standard, everyday shapes, while explaining the attributes of each and every one. This volume satisfies CCSS Math Standard 1.G.A.2.
