Silverlight 4 in Action Pete Brown

Silverlight 4 in Action is a fast-paced, comprehensive tutorial that guides the reader from creating "Hello World" to coding production-quality, data-driven rich internet applications with graphics, audio, and video content. Written for a developer who already knows how to code in C#, this fluff-free book covers the basics quickly and dives into the heart of Silverlight development using XAML (a markup language for creating user interface elements) and Visual Studio 2010. You'll learn not only how to accomplish tasks, but how the underlying runtime works.

In addition to the fundamentals, the book covers the new features in Silverlight like pixel shaders, webcam and microphone, and raw media, as well as WCF RIA Services and patterns like MVVM (Model-View-ViewModel). It explains developing offline and "out-of-browser" applications, managing video and audio, handling validation, navigation and deep-linking, and how each Silverlight feature fits into the overall Silverlight ecosystem.

Table of Contents

1. Introducing Silverlight
2. Core XAML
3. The application model and the plug-in
4. Integrating with the browser
5. Integrating with the desktop
6. Rendering, layout, and transforming
7. Panels
8. Human input
9. Text
10. Controls and UserControls
11. Binding
12. Data controls: DataGrid and DataForm
13. Input validation
14. Networking and communications
15. Navigation and dialogs
16. Structuring and testing with the MVVM/ViewModel pattern
17. WCF RIA Services
18. Graphics and effects
19. Printing
20. Displaying and capturing media (including webcam/mic)
21. Working with bitmap images
22. Animation and behaviors
23. Resources, styles, and control templates
24. Creating panels and controls
25. The install experience and preloaders
